

ARTECHE GROUP POLICY

We, Arteche group,

As designers, manufacturers, integrators and marketers of products and solutions for measurement, protection, automation, control and communication in electrical networks and as project managers for the generation, transmission and distribution of electricity,

Commit to:

Provide our customers with closeness and attention to the details satisfying their needs and their expectations thanks to the highest quality of Arteche products and services.

Establish a transparent environment where operate and interact focusing on the aspects that stand in our Ethical code and that are strongly present in our Corporate values, guaranteeing that our management is appropriate to the context and purpose of our organization.

Develop and promote a corporate culture of prevention of harmful conduct or control actions with adequate procedures that allow us to detect, correct and punish irregularities within the organization and with any external party.

Protect and guarantee human rights, safety in the work and the environment, in order to better understand and meet human and environment needs.

Encourage teamwork, cooperation and collaboration in all levels of the organization.

As a part of our culture and in order to assure the most competitive version of our products, we rely on the innovative and professional attitude of our staff with a preventive and continuous improvement culture, for the improvement of our products and services thanks to our vocation for efficiency and excellence.
